NELSON LAYLAH

Learn for our planet Springer

Lost for centuries, the Kebra Nagast (The Glory of Kings) is a truly majestic unveiling of ancient secrets. These pages were excised by royal decree from the authorized 1611 King James version of the Bible. Originally recorded in the ancient Ethiopian language (Ge'ez) by anonymous scribes, The Red Sea Press, Inc. and Kingston Publishers now bring you a complete, accurate modern English translation of this long suppressed account. Here is the most startling and fascinating revelation of hidden truths; not only revealing the present location of the Ark of the Covenant, but also explaining fully many of the puzzling questions on Biblical topics which have remained unanswered up to today.

PHILOSOPHY Carson-Dellosa Publishing
This book examines the shifting portrayal of the nation in school textbooks in 14 countries during periods of rapid political, social, and economic change. Drawing on a range of analytic strategies, the authors examine history and civics textbooks, and the teaching of such texts, along with other prominent curricular materials—children’s readers, a required text penned by the head of state, a holocaust curriculum, etc.. The authors analyze the uses of history and pedagogy in building, reinforcing and/or redefining the nation and state especially in the light of challenges to its legitimacy. The primary focus is on countries in developing or transitional contexts. Issues include the teaching of democratic civics in a multiethnic state with little history of democratic governance; shifts in teaching about the

Khmer Rouge in post-conflict Cambodia; children’s readers used to define national space in former republics of the Soviet Union; the development of Holocaust education in a context where citizens were both victims and perpetrators of violence; the creation of a national past in Turkmenistan; and so forth. The case studies are supplemented by commentary, an introduction and conclusion.

AQA GCSE Biology for Combined Science (Trilogy) Student Book Springer

This report from the National Task Force on Civic Learning and Democratic Engagement calls on the nation to reclaim higher education's civic mission. Commissioned by the Department of Education and released at a White House convening in January 2012, the report pushes back against a prevailing national dialogue that limits the mission of higher education to workforce preparation and training while marginalizing disciplines basic to democracy. It calls on educators and public leaders to advance a 21st century vision of college learning for all students, a vision with civic learning and democratic engagement an expected part of every student's college education. The report documents the nation's anemic civic health and includes recommendations for action that address campus culture, general education, and civic inquiry as part of major and career fields as well as hands on civic problem solving across differences. This report was prepared at the invitation of the U.S. Department of Education under the leadership of the Global Perspective Institute, Inc. (GPI) and AAC&U. It was developed with input from a series of national roundtables involving leaders from all parts of the higher education and civic renewal

communities.

Resources in Education Brookes Pub
Specifically tailored for the new AQA GCSE Science (9-1) specifications, this third edition supports your students on their journey from Key Stage 3 and through to success in the new linear GCSE qualifications. This series help students and teachers monitor progress, while supporting the increased demand, maths, and new practical requirements.

Evaluating U.S. Policy Options on the Horn of Africa Teachers College Press
The major reason of mass exile being mal-governance, this book vividly shows the yawning gap between African people and their leaders. It exposes most African leaders who bear more allegiance to their bank balances than to their country, the constitution, the flag, and their peoples future. Using my experience as a journalist for over 48 years, covering major events in Ethiopia/Africa, I have tried to bring a close-up portrait of the problems in Ethiopia, and more broadly the horn of Africa and the continent as a whole. This book illuminates the root causes of mass exile, the major problems in Ethiopia, and how that links back to the lack of freedom of expression. I have tried to situate current events in a larger historical backdrop by paraphrasing, summarizing, and quoting from historians excerpts, using description and analysis, part political travelogue, part contemporary history to bring the region to life, and answer one key question. Why so many Ethiopians are going in mass exile? The purpose of this book is to demonstrate the economic, political, social and environmental causes of human migration out of Ethiopia/Africa. It is an invitation for discourse, to explain, engage and encourage all those concerned in the

fate of Africa to wrestle with the challenges facing the continent today, without being burdened by a troubled past or daunted by a challenging future.

Rule of Law and Constitution Building UNESCO

First published in 1992. This volume includes reports, papers and discussion from a September 1990 educational research workshop on textbook analysis in history and social studies. Some 20 European countries are represented.

A Crucible Moment Springer Science & Business Media

This volume explores how twentieth- and twenty-first-century literary texts engage with relationships between humans and other animals. Written by forward-thinking early-career scholars, as well as established experts in the field, the chapters discuss key texts in the emergent canon of animal narratives, including Franz Kafka's animal stories, Yann Martel's *The Life of Pi*, Zakes Mda's *The Whale Caller*, and others. The volume is divided into four main sections. Two period-focused sections center on modernism and on late-twentieth- and twenty-first-century fiction, while two further sections foreground the more general project of theory building in literary animal studies, examining interconnections among concepts of species, sexuality, gender, and genre. The volume also raises issues that extend beyond the academic community, including ethical dimensions of human-animal relationships and the problems of species loss and diminishing biodiversity.

(Re)Constructing Memory: School Textbooks and the Imagination of the Nation Springer

Present facts in a visually engaging, cross-curricular learning format to help students quickly and easily comprehend

information. Infographics for grade 3 provides language arts- and math-based questions related to social studies and science topics such as the moon, the Mayflower, and more. -- Infographics for grade 3 offers a time saving, cross-curricular solution that supports 21st century learning. Filled with full-color visuals, Infographics for grade 3 illustrates essential facts and appeals to learners. The engaging infographics in this book help students successfully comprehend a large amount of data and answer corresponding questions. With a variety of high-interest science and social studies topics, these infographics are perfect to use individually for skill review or as an instructional resource. Students will learn to use a variety of nonfiction text features such as headings, diagrams, maps, sidebars, time lines, graphs, and more. --The Ready to Go: Infographics series for kindergarten to grade 5 combines math, language arts, science, and social studies into one convenient resource. Students will study infographics on a variety of science and social studies topics and use them to answer related math and language arts questions. The high-interest topics and full-color visuals keep students engaged in practicing valuable skills, from computation to using text features. This all-in-one series supports academic growth through concept application and enhanced critical thinking skills.

A Modern Translation of the Kebra Nagast UNESCO Publishing

Between the years 1964 and 1974, Ethiopian post-secondary students studying at home, in Europe, and in North America produced a number of journals. In them, these students explored the relationship between social theory and social change within the

project of building a socialist Ethiopia. Ethiopia in Theory examines the literature of this student movement, together with the movement's afterlife in Ethiopian politics and society, in order to ask a vital question: what does it mean to write today about the appropriation and indigenisation of Marxist and mainstream social science ideas in an Ethiopian and African context? And, further, what does the archive of revolutionary thought in Africa teach us about the practice of critical theory more generally?

Civic Republicanism and Civic Education UNESCO Publishing

How do schools worldwide treat the Holocaust as a subject? In which countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further formulates recommendations that will help policy-makers provide the educational means

by which pupils may develop Holocaust literacy.

Curriculum Development and Review for Democratic Citizenship and Human Rights Education

UNESCO Publishing

For all being interested in astronautics, this translation of Hermann Oberth's classic work is a truly historic event. Readers will be impressed with this extraordinary pioneer and his incredible achievement. In a relatively short work of 1923, Hermann Oberth laid down the mathematical laws governing rocketry and spaceflight, and he offered practical design considerations based on those laws.

Disaster risk reduction in school curricula: case studies from thirty countries UNESCO Publishing

This book guides the adoption, design, development and expectation of future digital teaching and learning projects/programs in K12 schools. It provides a series of case studies and reports experiences from international digital teaching and learning projects in K12 education. The book also furnishes advice for future school policy and investment in digital teaching and learning projects. Finally, the book provides an explanation of the future capacity and sustainability of digital teaching and learning in K12 schools.

The International status of education about the Holocaust BRILL

Michael Apple offers a powerful analysis of current debates and a compelling indictment of rightist proposals for change. Apple presents the causes and effects of further integrating schools into the corporate agenda, as well as current calls for a national curriculum and national testing, privatization and voucher plans, and fundamentalist religious pressures to censor textbooks.

He demonstrates who will be the winners and losers culturally and economically as the conservative restoration gains in strength, bringing with it an even greater re-stratification of knowledge and students in terms of race, class, and gender.

Schools, Curriculum and Civic Education for Building Democratic Citizens Walter de Gruyter GmbH & Co KG

A revised edition of the bestselling activities guide for math teachers Now updated with new math activities for computers and mobile devices—and now organized by the Common Core State Standards—this book includes more than 650 ready-to-use math starter activities that get kids quickly focused and working as soon as they enter the classroom. Ideally suited for any math curriculum, these high-interest problems spark involvement in the day's lesson, help students build skills, and allow teachers to handle daily management tasks without wasting valuable instructional time. A newly updated edition of a bestselling title Ideal for math teachers in grades six through twelve Includes more than 650 ready-to-use starter problems

Media and Information Literacy Curriculum for Educators and Learners The Red Sea Press

This publication contains a number of papers which explore educational issues in societies emerging from violent conflict situations, including Bosnia, Guatemala, Lebanon, Northern Ireland and Rwanda. The papers examine the role of education in contributing to reconciliation and peacebuilding, and the challenges in curriculum policy including the determination of language policies in multilingual and multicultural societies, the teaching of national history, and the

development of a sense of common citizenship and share identity.

Collaborative Teaming, Third Edition

Martha E. Snell is listed as the first author on the title page of the previous edition.

Employment Discrimination Law

United Nations Educational

This publication assesses progress towards Sustainable Development Goal 4 (SDG 4) on education and its ten targets, as well as other related education targets in the SDG agenda. It addresses inclusion in education, drawing attention to all those excluded from education, because of background or ability. The report is motivated by the explicit reference to inclusion in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.

Creatural Fictions Council of Europe

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape

tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Education, Conflict and Social Cohesion Britannica Educational Publishing

How can schools and the school curriculum contribute to building democratic citizens? This is a major question posed by governments, educational systems, schools, teachers and researchers around the world. One important way is to identify the competences needed for preparing democratic citizens and incorporate these within both the formal and informal school curriculum. Another question must then be posed- what competences do young citizens need to be considered as active and engaged in modern democracies? In 2011 an invited research symposium of leading civic and political educators, and social scientists from across Europe met in Hannover, Germany to consider this key concern facing Europe today. In examining the above questions the symposium addressed two significant issues: 1. Identify key competencies required for active citizenship of young people in Europe of the future. 2. Translate those competencies to school-based activities in the form of curricular and pedagogical

strategies. The publication *Civic Education and Competences for Engaging Citizens in Democracies* addressed the first issue and this volume addresses the second issue. Through discussion in the invited symposium, previously prepared papers, and participation in a modified Delphi Technique the participants have prepared chapters for this book. The chapters of this book represent the contribution of the participants before, during and after the symposium with opportunities for review and reflection about competences for democratic citizenship and the role of schools and the curriculum. Murray Print and Dirk Lange are professors from the University of Sydney and Leibniz University of Hannover respectively and are national leaders in civics and citizenship education in their respective countries. They have brought together a group of leading European civic and citizenship

educators from different academic fields to explore the key issue and to identify the competences for young people to become active and engaged European citizens.

Global Trends 2040 Cosimo Reports Regional organizations play an increasingly important role in strengthening and upholding the rule of law. Regional organizations are also increasingly seeking to strengthen constitutional governance in their member states by developing regulatory frameworks that reject and sanction unconstitutional transfers of power and attempts to remain in power unconstitutionally. This publication presents and discusses the initiatives and actions in the field of rule of law and constitution building by regional organizations. It also highlights their achievements, their limitations and the challenges they face, and puts forward policy recommendations for consideration.
