Math Journal 1 Everyday

Learning Corporation

The perfect book to

understand standing six

feet apart! Follow the

story about the King who

wants to give the Queen

something special for her

birthday. The Queen has

everything, everything

except a bed. The trouble

is that no one in the

Kingdom knows the

answer to a very

important question: How

Big is a Bed? because

beds at the time had not

yet been invented. The

Queen's birthday is only a

few days away. How can

they figure out what size

the bed should be? How

can the people figure out

how to measure? Readers

will learn it's not that

difficult and that everyone

can learn to do it.

How Big Is a Foot?

Everyday Learning

In the United States, some

populations suffer from

far greater disparities in

health than others. Those

disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health.

Only part of an

individual's health status

depends on his or her

behavior and choice;

community-wide problems

like poverty,

unemployment, poor

education, inadequate

housing, poor public

transportation,

interpersonal violence,

and decaying

neighborhoods also

contribute to health

inequities, as well as the

historic and ongoing

interplay of structures,

policies, and norms that

shape lives. When these

factors are not optimal in

a community, it does not

mean they are

intractable: such

inequities can be

mitigated by social

policies that can shape

health in powerful ways.

Communities in Action:

Pathways to Health Equity

seeks to delineate the

causes of and the

solutions to health

inequities in the United

States. This report focuses

on what communities can

do to promote health

equity, what actions are

needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Everyday Mathematics, Kindergarten Everyday Learning Corporation
Everyday Mathematics is a comprehensive Pre-K through Grade 6 mathematics program engineered for the Common Core State Standards. Developed by The University of Chicago, School Mathematics Project, the Everyday Mathematics spiral curriculum continually reinforces abstract math concepts through concrete real-world applications. -- Provided by publisher.
