Why do Republican politicians promise to rein in government, only to face repeated rebellions from Republican voters and media critics for betraying their principles? Why do Democratic politicians propose an array of different policies to match the diversity of their supporters, only to become mired in stark demographic divisions over issue priorities? In short, why do the two parties act so differently—whether in the electorate, on the campaign trail, or in public office?

*Asymmetric Politics* offers a comprehensive explanation: The Republican Party is the vehicle of an ideological movement while the Democratic Party is a coalition of social groups. Republican leaders prize conservatism and attract support by pledging loyalty to broad values. Democratic leaders instead seek concrete government action, appealing to voters' group identities and interests by endorsing specific policies. This fresh and comprehensive investigation reveals how Democrats and Republicans think differently about politics, rely on distinct sources of information, argue past one another, and pursue divergent goals in government. It provides a rigorous new understanding of contemporary polarization and governing dysfunction while demonstrating how longstanding features of American politics and public policy reflect our asymmetric party system.

*Direct Hits Us History in a Flash* JHU Press Donald Trump's first term as the 45th President of the United States of America has shocked the world. His attitudes towards Islam became a key point of contention on the campaign trail, and in power Trump has continued his war of divisive words and deeds. Here, acclaimed journalist Lawrence Pintak scrutinizes America's relationship with Islam since its foundation. Casting Donald Trump as a symptom of decades of misunderstanding and demonization of the Islamic world, as well as a cause of future tensions, Pintak shows how and why America's relationship with the world's largest religion has been so fractious, damaging and self-defeating. Featuring unique interviews with victims and perpetrators of Trump's policies, as well as analysis of the media's role in inflaming debate, *America & Islam* seeks to provide a complete guide to the twin challenges of terrorism and the polarizing rhetoric that fuels it, and sketches out a future based on co-operation and the reassertion of democratic values.

The large scale, practical uses of natural gas were initially introduced by innovators Joseph Pew and George Westinghouse for the steel and glass industries in Pittsburgh, and local gas companies evolved from individual wells to an interstate supply network acquired by Rockefeller's Standard Oil interests. Natural gas is now a prevalent part of American markets and with the production from the Marcellus shale is filling the critical void left by a lack of new coal, oil, and nuclear power facilities. This vital American enterprise began in the Appalachian states as an accidental and underestimated byproduct of the oil rush of 1859. This book explores the evolution and significance of the natural gas industry to the present day.

Case Studies in Crisis Communication: International Perspectives on Hits and Misses was created to fill the gap for a much-needed textbook in case studies in crisis communication from international perspectives. The events of September 11, 2001, other major world crises, and the ongoing macroeconomic challenges of financial institutions, justify the need for this book. While existing textbooks on the subject focus on U.S. corporate cases, they may not appeal equally to students and practitioners in other countries, hence the need to analyze cases from the United States and from other world regions. The variety and the international focus of the cases, be they environmental, health or management successes or failures, makes this book more appealing to a wider audience. These cases examine socio-cultural issues associated with responding to a variety of crises.

Parents had questions about the tests their children took at school. They considered them to be common sense questions. They posed them to the businesspeople, publishers, and politicians who championed tests. They also posed them to the school administrators, teachers, and union leaders who criticized them. This book examines the questions the parents posed, the answers they elicited, and the changes they prodded.

Contemporary societies are constructed, constricted, and constrained by various series of examinations. Governments of both Western and non-Western countries tend to conduct detailed, multi-layered and continuous systems of tests or examinations. International tests, such as PISA and TIMSS, have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries. Examinations therefore provide a methodological pivot for comparing a range of societies. They enable us to contrast the West and the East; the North and the South; tribal and mass society; ancient and postmodern civilization; and so on. Comparing parallel societies from across Asia, the Middle East, Europe, and North America, this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations. It uses ethnographies, interviews, questionnaires, documents, statistics, and big-data analyses to make comparisons on broad

scales of time and space. In so doing, it suggests hypotheses encompassing different kinds of societies in human history, including those in the Axial Age and the Modern Ages.

*Timelines of History* Princeton Review

Humans are a recent event in the planet's history, but we've wasted little time in making our mark. The range of our achievements has created a rich and elaborate heritage that we have the unique ability to capture and record—meaning we can look back and learn from the road traveled. *Timelines of History* begins with the emergence of our earliest African ancestors and takes the reader through the history of cultures and nations around the world to arrive at the present day—the beginning of a new millennium. A dynamic, layered timeline zooms in and out of time, speeding up or slowing down to keep pace with the size and scope of events.

The year 1945 was a chaotic one, both for the world, of course, and for Winston Churchill. Communism was on the march and the people of Bulgaria, Romania, Yugoslavia, and Poland all found themselves in the grip of the Soviets. The Red Army occupied a large German territory, and the Kremlin was manipulating post-war food shortages, labor disputes, and social unrest in Greece, France, and Italy. Having spent his “wilderness years” in the late 1930s warning of the dangers of diplomatic and military weakness and the growing menace of Nazism, in 1946 Churchill made a trip to Fulton, Missouri, to deliver a speech entitled “The Sinews of Peace”—now known as the Iron Curtain Speech—which served to fundamentally define the dangers of Soviet totalitarian Communism. This is the story of that pivotal speech and how it came to be given, and a portrait of the irrepensible man who delivered it.

The Struggle for Democracy in Education extends the insightful arguments Michael W. Apple provided in *Can Education Change Society?* It provides detailed examinations of both local and system-wide struggles around conflicting versions of democracy. Grounded in a key set of ethical and political responsibilities for those who care deeply about education, Apple and his co-authors interrogate conflicting models of democratic education, one interested in the common good and the creation of critical citizens, the other market-oriented and meant to meet a set of more conservative economic needs. Through a series of powerful international case studies, this volume explores the contested terrain, combining powerful theory with the “stuff” of schools, political and pedagogical actions, and the lives of individuals. These detailed examinations provide the reader with a more nuanced understanding of how policy, history, and varied actors with varied agendas come together, and the very real people and systems that are impacted by these conflicts. The Struggle for Democracy in Education asks us to face and understand these myriad forces and actors—both progressive and retrogressive—and to ask what we can do to ensure that the education that is

created is worthy of its name. In the

process, the book gives us real examples  
of critically democratic education and

what we can learn from these struggles.
