Turkey's involvement in the Gulf War in 1991 paved the way for the country's acceptance into the European Union. This book traces that process and in the first part looks at Turkey's foreign policy in the 1990s, considering the ability of the country to withstand the repercussions of the fall of communism. It focuses on Turkey's achievement in halting and minimising the effects of the temporary devaluation in its strategic importance that resulted from the waning of the Cold War and the disintegration of the Soviet Union, the skilful way in which Turkey avoided becoming embroiled in the ethnic upheavals in Central Asia, the Balkans and the Middle East, and the development of a continued policy of closer integration into the European and western worlds. Internal politics are the focus of the second part of the book, addressing the curbing of the Kurdish revolt, the economic gains made, and the strengthening of civil society. Nachmani goes on to analyse the prospects for Turkey in the twenty-first century, in the light of the possible integration into Europe, which may leave the country's leadership free to deal effectively with domestic issues. This book will make crucial reading for anyone studying Turkish politics, or indeed European or European Union politics.

The Periodic Table: Nature's Building Blocks: An Introduction to the Naturally Occurring Elements, Their Origins and Their Uses addresses how minerals and their elements are used, where the elements come from in nature, and their applications in modern society. The book is structured in a logical way using the periodic table as its outline. It begins with an introduction of the history of the periodic table and a short introduction to mineralogy. Element sections contain their history, how they were discovered, and a description of the minerals that contain the element. Sections conclude with our current use of each element. Abundant color photos of some of the most characteristic minerals containing the element accompany the discussion. Ideal for students and researchers working in inorganic chemistry, mineralogy and geology, this book provides the foundational knowledge needed for successful study and work in this exciting area. Describes the link between geology, minerals and chemistry to show how chemistry relies on elements from nature Emphasizes the connection between geology, mineralogy and daily life, showing how minerals contribute to the things we use and in our modern economy Contains abundant color photos of each mineral that bring the periodic table to life

This book explores European soldiers' encounters with their continent's exotic frontiers from the French Revolution to the First World War. In numerous military expeditions to Italy, Spain, Russia,

Greece and the 'Levant' they found wild landscapes and strange societies inhabited by peoples who needed to be 'civilized.' Yet often they also discovered founding sites of Europe's own 'civilization' (Rome, Jerusalem) or decaying reminders of ancient grandeur. The resulting encounters proved seminal in forging a military version of the 'civilizing mission' that shaped Europe's image of itself as well as its relations with its own periphery during the long nineteenth century.

The topic chosen by Nietzsche for his Pforta dissertation was Theognis, his life in Megara, his lyrical production, and his views on the gods, morality and politics. Nietzsche saw Theognis as the intellectual champion of the defeated Megarian aristocracy, who sought to preserve the Dorian spirit and its noble virtues. The interests that guided Nietzsche transcended scientific philology and embraced a concern for the social and political context he adumbrated in the Theognidea. The editors of this volume refer to this novel standpoint as constituting a rudimentary political philology, showing that Theognis' aristocratism determined and guided Nietzsche's critique of the moral point of view and his conception of an aristocratic state. Contents Introduction: Nietzsche's Aristocratism by Renato Cristi Part I: Theognis and Nietzsche's Aristocratism Part II. Nietzsche's Aristocratic Ethics: Command and Obedience Part III. Migration and Insecurity addresses an important but rarely considered aspect of migration: how are migrants and refugees received in their new homes? What defines inclusion and exclusion for migrants, and how does this affect the concept of 'belonging' in a transnational society? In these essays, the distinguished contributors discuss the places in which migrants and refugees construct and experience their belonging, and situate this discussion in the context of the international system and government policy. Chapters interrogate the notion of ...

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

"This study explores the theme of Batavian ethnicity and ethnogenesis in the context of the Early Roman empire. Its starting point is the current view in the social and historical sciences of ethnicity as a culturally determined, subjective construct that is shaped through interaction with an ethnic 'other'. The study analyses literary, epigraphic and archaeological sources relating to the Batavian image and self-image against the backdrop of Batavian integration into the Roman world. The Batavians were intensively exploited by the Roman authorities for the recruitment of auxiliary soldiers, with the result that their society developed into a full-blown military community."--Jacket.

Australia has the ideal conditions for growing and processing table olives. In a climate where the majority of table olives eaten by Australians are imported, real opportunities exist for a domestic table olive industry. Attention to quality and safety will ensure that Australian table olive producers are in a position to tackle and make inroads into the international export market. The aim of this manual is to provide olive growers and processors with internationally based guidelines for ensuring the quality and safety of processed table olives. This manual covers all aspects essential for the production of safe, nutritious and marketable table olives including site selection, recommended varieties, pest and disease control, primary and secondary processing, and quality and safety testing.

Since the first volume of *The Biology of Sea Turtles* was published in 1997, the field has grown and

matured in ways few of the authors would have predicted—particularly in the areas of physiology, behavior, genetics, and health. Volume III presents timely coverage of emerging areas as well as the integration of approaches and information that did not exist even a decade ago. The book assembles the foremost experts in each topic to provide the most up-to-date and comprehensive book on sea turtles available today. New areas covered include in vivo imaging of structure, spatial distributions of marine turtles at sea, epibiosis, imprinting, parasitology, and climatic effects. Life history is explored in three chapters covering age determination, predator-prey interactions, and mortality from bycatch. *The Biology of Sea Turtles, Volume III* will inspire scientists and students to explore and expand their understanding of these intriguing animals. The book provides clear baseline summaries, thoughtful syntheses, and effective presentation of the most fundamental topics spanning form and function, health, distributions, behavior, genetics, evolution, and ecology. Its scope and depth make it the definitive go-to reference in the field.
